### **HOD's Message**

PSN College of Engineering and technology, is introducing M.Sc Applied Chemistry degree course, approved by Anna University, Chennai, from the academic year 2017 – 2018.

This is a unique course, designed to cater the requirements of chemical and pharmaceutical industries with special emphasis on subjects related to them, apart from regular academic topics essential for teaching and research. The successful students will be eligible for placements in industry and research as well as in teaching. The course is conducted by well qualified professors, with rich experience in teaching and research. We firmly believe in moulding the students into excellent chemists with meticulous knowledge in chemistry.

Since the Department of Applied Chemistry (PG) is part of the Center for Scientific and Applied Research of the college, the students will have special privilege of accessing sophisticated instruments like, FTIR spectrometer, UV-Vis spectrometer, Plasma reactors, Cyclic voltammeter, Electrochemical work station, Photo reactor, Glove box etc.

Our students will be motivated and supported to crack competitive examinations like CSIR-NET, SET, GATE etc. Also, there is ample opportunity for the students to continue in research programme for their Ph.D. degree in our research centre itself.

I assure you, that we shall take care of the overall academic performance and the future of our students.

I am immensely glad to invite you to join us in the coming academic year.

**Dr. S. Theodore David Manickam**
